All the directorates of the
Municipality of Tirana.

PROJECT DESCRIPTION

This project primarily aims to establish a website where all possible data on Tirana will be collected and made available to the interested parties. In addition to collecting data and generating new indicators that will guide policy-making in the Municipality of Tirana, this project will be very important in increasing transparency regarding Tirana and the Municipality. Data collection will enable the officials of the Municipality of Tirana to make more accurate analysis and consequently to make better decisions. On the other hand, the citizens, journalists, researchers, visitors or foreign investors will be able to easily access any information they need to know about Tirana.

OVERALL OBJECTIVE

Open Data Tirana promotes transparency through the collection of the data from public offices on social-economic indicators, processes and publishes these data based on the state of the art information technologies.

PROJECT IMPLEMENTATION MODALITY

The project will include several phases:
First, identifying and structuring the relevant social-economic statistical indicators that reflect the current situation of the local development.
Second, identifying sources of the data to be collected and processed to extract the selected indicators.
Third, collecting statistical data and creating a database that will serve as a base for the processing of these indicators. This database will be updated and accessible to a certain category of users.
Forth, data processing and analysing as well as extracting priorly categorised indicators.
Fifth, establishing the portal Open Data Tirana that will include all social-economic indicators for use of all the interested parties.

PRELIMINARY IMPACTS

⇨ The generation of Social-economic indicators on the city and the Municipality of Tirana related to the identification (prior assessment), collection, processing and management of these statistical data.
⇨ The local economy of Tirana analysed be means of these data and its development potentials assessed.
⇨ The publication of the generated statistics and other statistical outputs whether or not intended for external use disseminated.
